Summary

Skilled .NET Developer with expertise in .NET, HTML, CSS, JavaScript, and MSSQL. Anticipated cybersecurity certificate from FAU in Fall 2025. Experienced in bug resolution, task automation, and system performance enhancement. Demonstrated success in team-based solution implementation.

Work Experience

eCoast Networks **Nov 2024 - Present**
.NET Developer
- Collaborated in a small team to create and update an internal .NET application using Agile methodologies, enhancing application performance and user experience
- Resolved client issues promptly using effective communication skills, improving client satisfaction and maintaining service reliability
- Troubleshot issues in the .NET application and on SQL servers using DevOps practices, ensuring system stability and reducing downtime

SPServicing through Infosys **Aug 2023 - May 2024**
.NET Developer
- Utilized GitHub to collaborate with team members to ensure up to date and consistent code integration.
- Designed and implemented stored procedures in MSSQL Server to automate tasks, reducing manual workload and increasing efficiency
- Used Visual Studio to run and host services locally, providing strong development and testing environments.
- Analyzed .NET-based code to identify and resolve bugs, improving system reliability and performance.
- Authored detailed documentation for various technologies and services to facilitate knowledge sharing.
- Triaged and resolved issues in a collaborative team setting, improving system reliability and team efficiency
- Provided comprehensive backend support using .NET for internal employee management systems and assisted in frontend UI changes utilizing HTML, CSS, and JavaScript.
- Built MSSQL-based templates to speed up recordkeeping for Human Resources, enhancing data accuracy and retrieval speed

United Airlines Through Infosys **Jul 2021 - Jan 2023**
.NET Developer
- Utilized AppDynamics, Datadog, and other monitoring tools to track and address website performance issues for United.com, improving site reliability and user experience
- Captured and analyzed API logs using Fiddler to troubleshoot and resolve issues, ensuring smooth operation of flight booking and management features, enhancing customer satisfaction
- Applied HTML, CSS, and JavaScript expertise to implement and improve changes to the frontend UI of United.com, resulting in a more user-friendly interface
- Deployed updates and changes to both development and QA versions of United.com, ensuring timely and accurate software releases
- Analyzed .NET and React-based code to identify and fix bugs, improving application stability and performance
- Managed and tracked code changes using GitHub, including performing rollbacks, to ensure code integrity and facilitate team collaboration

Projects

RVTR Campsite **Jun 2021**
- Utilized GitHub for version control, tracking, and roll back changes to maintain code integrity.
- Worked in a team setting to delegate workflows and track issues.
- Created and updated processes for validating data.
- Utilized external RESTful APIs and ASP.NET to create and use API endpoints.
- Worked on a web-based user interface using Angular and Wrote unit and integration tests with Xunit.

Revature Chess Game **May 2021**
- Created a web-based user interface using HTML and implemented chessboard logic and visuals with JavaScript.
- Created RESTful Login and Register API Endpoints.
- Created a CI/CD pipeline to automatically build, test, analyze, package, and deploy the application.
- Managed data with an MSSQL server and utilized Azure for both database hosting and application deployment.

Core Skills

- C#, JavaScript, ASP.NET MVC, Ajax, Typescript, ASP.NET Web API, Bootstrap, React, Angular, Python, Java, .net core, C++, JSON, C, SOAP, XML, ASP.NET WebAPI, REST, SPA, JavaScript, Postgres, Microsoft Azure, MYSQL, SQL, Entity Framework, MSSQL, Xunit, Sonarcloud, Trello, DevOps, Agile, Scrum, T-SQL, resolving technical issues, developing applications, vb.net, ability to work independently, sql databases, object-oriented programming, Front-end development, Refactoring, aws services, technical skills, postgresql, problem-solving skills, interpersonal skills, security architecture, risk management, active directory, Windows Server, encryption, information technology, incident response, configuration management, Risk Assessment, cloud security, IT Infrastructure, analytical, communication skills, regulatory requirements, stem, mitigation strategies, industry standards, wireless infrastructure, SDLC

Education

Florida Atlantic University **Jan 2025 - Present**

Minor Certificate, Cybersecurity

- **Achievements:** Conducted research and analysis on emerging cybersecurity threats and vulnerabilities to inform risk management strategies
- **Coursework:** Applied Cryptography, Cloud Application Security

Florida Atlantic University **Dec 2020**

Bachelor of Science, Computer Science

- **Coursework:** Python Programming, Mobile App Projects, Design/Analysis of Algorithms, Intro to Database Structures, Intro to Data Communications, Software-Hardware Co-design, Intro Artificial Intelligence, Structured Computer Architecture, Computer Operating Systems, Stochastic Models for CS, Applied Database Systems, Principles Software Engineering, Data Structure/Algorithm Analysis, Introduction To Logic Design, Foundations of Computer Science, Intro to Programming in C

Certificates

- **IBM Full Stack Software Developer Professional Certificate:**Mar 2025
  IBM Certification including certificates in "HTML, CSS, and Javascript", "Cloud Computing", "Git and Github", "React Back-End Apps with Node.js and Express", "Python for Data Science, AI, & Development", "Developing AI Applications with Python and Flask", "Django Application Development with SQL and Databases", "Docker, Kubernetes, and Openshift", "Software Engineering", and "Generative AI"
